

Project Planning Phase

Planning Logic — Sprint, Epic, Story & Story Points

A Sprint is a fixed period or duration in which a team works to complete a set of tasks.

An Epic is a big task or project that is too large to complete in one sprint. It is broken down into smaller tasks (stories) that can be completed over multiple sprints.

A Story is a small task; it is part of an Epic.

A Story Point is a number representing how much effort a story takes to complete (usually a Fibonacci number: 1 = very easy, 2 = normal, 3 = moderate, 5 = difficult).

Story Point scale used: 1, 2, 3, 5

Sprint 1

Request Submission (Epic 1)

Submit network access/change request via Service Catalog (USN-1) 3

Receive submission confirmation (USN-2) 1

Approval Routing (Epic 2)

View pending approvals in My Approvals (USN-3) 2

Approve / Reject request with comments (USN-4) 3

Fulfillment (Epic 3)

Auto-create Catalog Task on approval (USN-5) 3

Total Story Points in Sprint 1 = 3+1+2+3+3 = 12

Sprint 2

Fulfillment (Epic 3 contd.)

Update & close fulfillment task (USN-6) 2

Escalation (Epic 4)

Auto-create Incident on capacity/security policy conflict (USN-7) 3

Notifications (Epic 5)

Email employee on approval (USN-8) 1

Email employee on rejection (USN-9) 1

Status Tracking (Epic 6)

View request status in My Requests (USN-10) 2

Security (Epic 7)

Role-based ACL restrictions (USN-11) 3

Cross-scope access configuration (USN-12) 2

UAT and bug fixes (USN-13) 2

Total Story Points in Sprint 2 = $2+3+1+1+2+3+2+2 = 16$

Total Story Points

Sprint 1 = 12

Sprint 2 = 16

Velocity = Total Story Points Completed / Number of Sprints

Total Story Points = $12+16 = 28$

No. of Sprints = 2

Velocity = $28/2 = 14$ (Story Points per Sprint)

Your team's velocity is 14 Story Points per Sprint.
